## We turn satellite data into insights for nature & people

In the Indian Himalayas we support early stage nature venture builder Alsisar Impact in monitoring the impact of their work on portfolio level

Founder Demographics (OI0933) Leadership Demographics (OI0667) Ownership Demographics (OI4221)

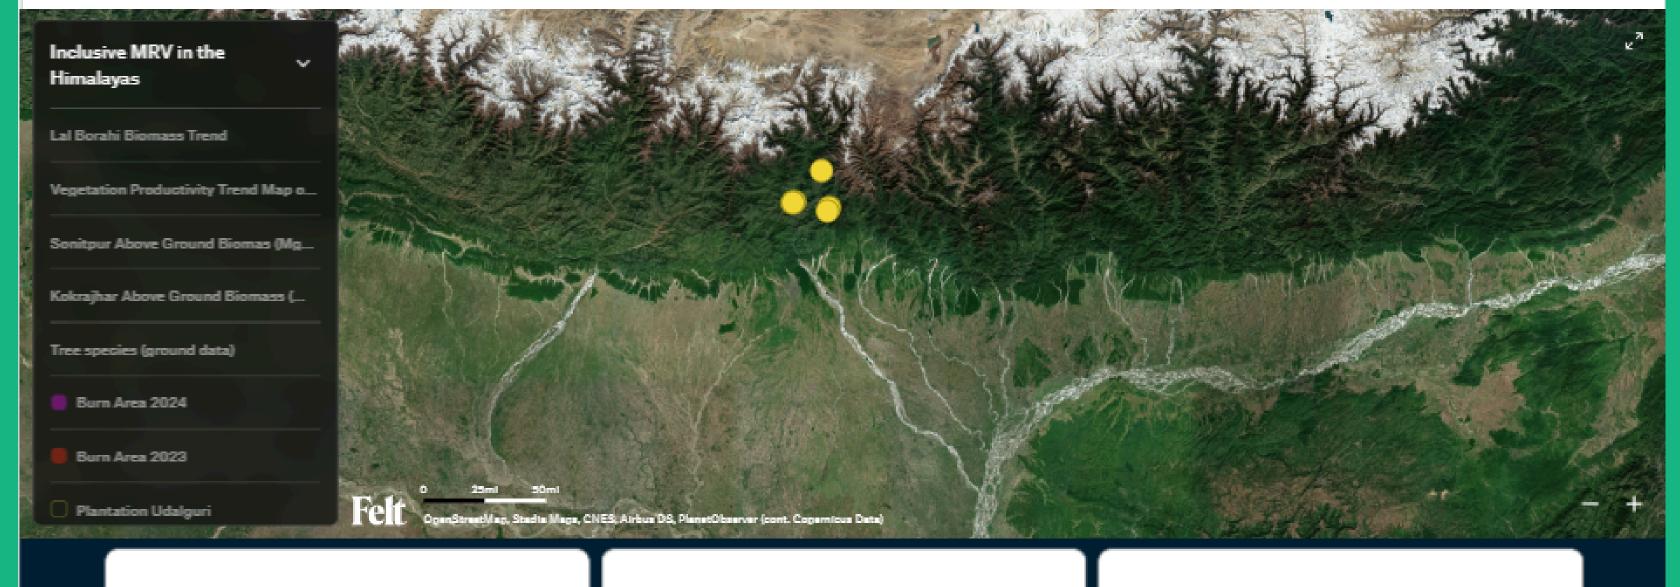

SDG's Aligned

For the first theme on inclusive ownership and leadership, ALSiSAR IMPACT and Vertify partnered with Agapi and local soda companies to collect on-field demographic data of farmers—capturing insights across gender, caste, and community. This ground-level understanding helps design more inclusive interventions and supports SDGs 5, 8, and 10 by advancing equity in ownership, leadership, and economic participation within rural value chains.

Agapi Sikkim - Impact on Environment
